# taskblitz

Project based teamwork – solved

*Vienna, 1<sup>st</sup> October, 2015* **- taskblitz** is an integrated collaboration and teamwork solution that supports their users in the areas of personal task management, project management, time tracking, invoicing and communication. It is publicly available as a cloud based software as a service solution in any web browser and on many mobile platforms. After a 30 days trial use of all features users can subscribe to a paid plan starting at $ 10 per user and month.

taskblitz is for people that need more than a simple todo list application and are sick of using old fashioned form-based business applications or excel sheets. Although taskblitz also is great for single person users, customers will get the most value out of it when using it in a team or organization.

## Features

**taskblitz** follows an all-in-one approach when it comes to its features set. Unlike many other productivity solution we enable our customers to manage their projects from an idea stage, writing estimates till executing and finally invoicing them in one single application. Users get an out of the box solution fitted to their typical business process and avoid:

- Juggling many different applications.
- The technical quirks of make many different application work together.
- Administrative overload while handling many applications.
- Paying a lot of subscription fees for many application.

Projects and tasks are the core principles of every project orientated productivity solution and also in taskblitz. But with our solution we offer a lot of more features that can be summed up in the three scopes of *Collaboration*, *Documentation* and *Communication*:

- Tasks - Organize your work and projects into tasks and collaboratively work on them.
- Projects
  - Planning – Structure projects into milestones and tasks and automatically create proposals from it.
  - Execution –
  - Controlling – Overview all project KPIs and take action on unexpected incidents.
- Multi-Projects – Manage projects in different stages and the execution on time
- Chat - Get rid of email chaos and use the built-in chat for fast, easy and though powerful real-time communication.
- Calendar - Get a powerful visualization of all your tasks, milestones and appointments.
- Files - Share files with your team and use a shared space for project documentation.
- Notes - Take notes and write project documentation together with your team.
- Time tracking - Track your work time based on tasks or projects and always have team or project reports at your fingertips.
- Invoicing - Create effectively invoices and proposals semi-automatic based on your projects and timesheets.
- Reports - Get insights on your project's and your team's performance.

- Organization - Manage your team effectively and avoid high workload.

Besides the functional aspects of taskblitz we wanted to create a solution that is powerful but also easy to use with a beautiful interface. We also dismissed formal project management jargon from the interface and used easy to understand terms instead.

## Integrations

**taskblitz** has been built with the modern cloud environment in mind and integrates perfectly with other applications and services. Users can use their existing cloud storage on services like dropbox, box.net or Google Drive within taskblitz or can choose to use our provided cloud based filespace. Although taskblitz comes with each own great built in chat solution, we also connect to other business chat service like slack or hipchat and sent relevant information of people projects there.

Most people have their existing office environment they used to work with every day like an email client or a calendar. taskblitz doesn't want to replace these tools, but integrates them smoothly into our solution. The taskblitz calendar for example offers a bidirectional integration with your existing calendar software. How? You can simply view your day to day events in our calendar and subscribe to your taskblitz tasks on your desktop calendar via ical interface. Furthermore you can easily create new tasks by forwarding emails to a specific address and taskblitz will automatically extract the relevant information in a smart way.

If you probably have used a project management solution before and want to switch to taskblitz we highly appreciate that step and can offer you direct import interfaces to popular services so that you can seamlessly transit with your projects, data, etc. to our solution.

## Apps

**taskblitz** is currently available as web application via any modern web browser. Besides we also offer mobile apps for *Android* and *iOS* at the moments. Users can download our app named "**taskblitz Project Management**" either on *Google Play* or on the *Apple App Store* for free. The app has been created to work properly on both, smartphones and tablets. To use the mobile app it is required that users have an existing taskblitz account.

We plan to extend the availability further to platforms like Windows Mobile in the near future.

## About taskblitz

**taskblitz** is an integrated collaboration and teamwork solution that supports their users in the areas of personal task management, project management, time tracking, invoicing and communication. It is publicly available as a cloud based software as a service solution in any web browser and on many mobile platforms. With the vision to help people all over the world to organize their work, taskblitz offers a feature rich but yet easy to use and nice looking solution for individuals and teams.

taskblitz has been founded by Erich Holzbauer in early 2015 and is publicly available since July 2015. Erich is a solo founder with a professional background in the advertising and media industry with the vision to make a professional project management and collaboration solution available and easy to use for anyone. He holds two master degrees in information sciences and in business administration.
